

Client: JBS Environmental
Location: Mascot
Time Scale: 5 weeks
Area: Approx 300m²

Client Profile

JBS Environmental is an environmental consulting company that provides practical, effective and reliable solutions to the property, industrial and transport sectors. Since 1995, they have continued to expand and now deliver services throughout all of Australia.

Scope of Works

To create a corporate environment that would provide a safe, comfortable, functional and productive working environment for their staff and visitors, works were to be carried out with in a strict time frame and budget.

Works Included

- ▲ Boardroom renovation including cabling and projection systems.
- ▲ Installation of spacious workstations including power requirements.
- ▲ Design and install a break out area including kitchen, furniture and seating
- ▲ Re carpeting of entire office area including staircase
- ▲ Design and construct a director's office suites with meeting areas
- ▲ Create a reception area with a comfortable waiting area.

Challenge

A noisy breakout area, the walls were rendered and the existing ceiling was plaster board which limited the absorption of sound.

Solution

To lay an acoustic vinyl floor, this is a vinyl product that has the water resistant properties of regular vinyl but with a sponge like product on the back that gives the vinyl an ability to absorb sound waves. Also greatly increasing comfort under foot.

“ APEX were professional from start to finish. Everything was completed on time and within our agreed budget. All the staff are over-the-moon with the new office and our clients haven't stopped visiting since we moved in. ”

Amy Worth -Office Manager, JBS Environmental.
