

Client: KC World
Location: Rosebery
Time Scale: 3 weeks
Area: 630m²

Client Profile:

KC World is an importer, distributor & wholesaler of eco friendly food service packaging solutions, providing answers to a healthier environment. ThinkEcobyKCW™ allows businesses & consumers to make a conscious step towards minimising their carbon footprint.

Scope of Works:

Create an uplifting office environment using unique furniture and storage systems that will allow staff to perform their duties in a cohesive manner whilst still allowing for privacy.

Works Included:

- ▲ Preparation and lodgement of council documents with Sydney City Council.
- ▲ Installation of a meeting room table that would also double as a means of demonstrating product visible through a glass top.
- ▲ Installation of unique workstations including power and data.
- ▲ Installation of office furniture and storage.
- ▲ Construction of a spacious manager's office.
- ▲ The installation of privacy film, and signage.
- ▲ Installation of unique lighting systems, dimmable for Audio Visual presentations.

Challenge:

The office area was designed with no ceiling so reticulating cabling around the site would be difficult.

Solution:

A powder coated tray system was installed from suspension rods, the tray system was segregated so power and data cabling could be kept separate. The system was installed in such a way as to be in keeping with the 'industrial look' of the building.

“Apex Executive Interiors are extremely thorough and very organised, they managed the whole fitout from start to finish. I couldn't have asked for more.”

*Kylie Weatherall - Director, Products & Design
