

Client: National Transport Insurance

Location: Sydney CBD

Time Scale: 2 weekends

Area: Approx 365m²

Client Profile:

National Transport Insurance is Australia's leading transport insurance specialist.

Scope of Works:

Reconfigure an existing layout to facilitate a greater number of staff.

Works Included:

- ▲ Assisting in council approvals.
- ▲ Installation of new workstations including power and category 6 data.
- ▲ A new vibrant reception area.
- ▲ Demolition of existing walls and repairs to the ceiling.
- ▲ Repainting of the entire office.
- ▲ Partition walls, doors complete with uniquely designed privacy film with a truck logo.
- ▲ Various types of office seating.
- ▲ Designing and installing signage.
- ▲ Reupholstering existing workstation screens with new fabric.

Challenge:

The works had the potential to disrupt nearly every aspect of the office as we were working and painting in almost every square metre of the fitout.

Solution:

Works were carefully staged and planned to be carried out over 2 weekends, the construction plan was calculated to the hour and strictly adhered to so we could ensure the NTI were in no way inconvenienced by our presence.

“ We used Apex Executive Interiors to redesign a large portion of our office space. During the whole refurbishment process our business was not disrupted and all the work was done over a few weekends. More importantly the whole office is a much more open and welcoming space for visitors and staff. Thanks for a job well done. ”

Daniela De la Llana

Business Development Manager, National Transport Insurance
