

Client: PHN Central and Eastern Sydney
Location: Mascot, Sydney
Time Scale: 7 Weeks
Area: Approx. 1500m²

Client Profile

PHN is a not for profit organisation whose main focus is to improve health in the community.

Scope of Works

Consolidate 2 existing PHN offices into a new single location, while reducing the overall square meterage. The new office fitout needs to be an Activity Based Working (ABW) environment with a focus on collaboration.

Works Included

- ▲ Interior design for a flexible and efficient ABW office concept.
- ▲ An acoustic operable wall with sliding folding partitions.
- ▲ Design and construction for the bespoke joinery interior fitout feature walls and ceiling.
- ▲ Construction of ABW staff lockers for personal effects.
- ▲ Upgrading existing facilities to be compliant with AS1428.1 2009 disabled access standards.
- ▲ Installation of electronic height adjustable workstations.
- ▲ Building confidential meeting areas and quiet spaces.
- ▲ Coordinating all trades and services throughout the ABW office fitout.

Challenge

Introduce a new concept of collaborative working using ABW. Providing staff with a choice of how, when and where they work.

Solutions

Implement a change management plan to help transition to ABW. Design a dynamic fitout with a variety of different activity zones. Create both aesthetically pleasing and functional work spaces.

“Apex Executive Interiors were committed to the fitout project from day one, working with us, the building manager, our own management, Board, staff and existing site contacts to not only build us a new site that came in at budget and exceeded our expectations but also supported us in full in the move process in terms of relocating furniture, staff and winding down the existing sites.”

Ian Hunter, Infrastructure Manager
