

LED lighting upgrade incentive scheme

As part of the NSW Government's Energy Savings Scheme (ESS) businesses can access the Home Energy Efficiency Retrofits (HEER) financial incentives program.

This heavily subsidised program offers to upgrade your companies lighting to more energy efficient LED lighting for a minimal one off cost. The upgrade could be in the form of installing new LED: panels, battens, industrial warehouse high and low bay lamps and down lights.

Only Accredited Certificate Providers (ACP) are allowed to implement the upgrade using the HEER program and installation must be carried out by licensed and fully trained ACP technicians.

Benefits of upgrading

- Experience large savings on installation costs.
- Energy efficient lighting will help reduce your electricity bill.
- LED lighting lasts longer which in turn reduces maintenance costs.
- They are eco-friendly and better for the environment.
- LED lights are instantly bright when they are turned on.

How to reduce noise in your office

Acoustic panels are an excellent stylish solution for dealing with reverberating noise issues in the work environment. Our new range of acoustic panels are very versatile and can be installed in a wide range of sizes, shapes, colours and patterns.

We can create a unique and decorative sound absorbing wall in your reception area that filters out unwanted noise and reflect your cooperate branding. The acoustic wall panels are eco friendly, hard wearing and can be used as pinnable panels.

Transforming an outdated office into a state of the art working environment

Permasteelisa case study

Client Profile

Permasteelisa is a worldwide leader in the architectural and structural metals manufacturing industry.

Scope of Works

Demolish 2 entire floors and build a flexible office space that prioritises connectivity and collaboration.

The building was dated and had been extended several times leaving the floors with multiple uneven levels which was unsuitable for an open plan layout.

Find out how we did it

New member of the team

To meet the growth in demand for our fitout services we are pleased to announce that Joey Christie has joined the Apex Executive Interiors team as a senior project manager. He brings with him an in-depth knowledge and understanding of the commercial fitout industry and specialises in the more technically challenging fitout and refurbishment projects.

His strong understanding of construction techniques and building processes will complement and expand our existing fitout team.

Joey's role also entails expanding existing client relationships and cultivating new business opportunities. Contact Joey by calling 02 9635 9100 or emailing jchristie@apexei.com.au
