

Multi use, adaptable and space efficient

With office space becoming even more of a premium both Steve and Karl agree that multi use, adaptable and space efficient design were the major stand outs at Neocon Chicago this year. With an added focus on making the agile workspace more user friendly.

Designers are also continuing to morph residential and commercial aesthetics bringing the look and feel of the home into office spaces. Below are just a few of the highlights from this years Neocon trade show, for a full report please [contact us](#).

Transform your workplace with these innovative space saving ideas

A private micro office or is the phone booth making a big comeback

Minimalist Scandinavian design is redefining contemporary commercial workplaces

This adaptable meeting area fits neatly into the footprint of a single workstation

These versatile desks can slide together to form a larger workspace area when needed
